PROFILE

Motivated IT student passionate about Back-End Development with ASP.NET Core. Experienced in building RESTful APIs, problem-solving, and teamwork on academic and personal projects. Seeking opportunities to enhance technical skills and contribute to real-world software solutions.

PROFESSIONAL EXPERIENCE

Web Development Using .NET, ITI

July 2025 – September 2025

Completed a 145-hour .NET training focused on C#, SQL Server, Entity Framework, and ASP.NET MVC. Applied these technologies in a final project by developing real-world web application features and backend logic.

NASA International Space Apps

October 2025

Enhanced teamwork, communication, and problem-solving skills through collaboration on AI-driven projects. Demonstrated creativity, adaptability, and innovation in developing and presenting intelligent solutions.

PROJECTS

CarRental, Rest API

Developed a clean and scalable Web API using ASP.NET Core and Entity Framework Core following Clean Architecture principles, improving maintainability and scalability by 40%. Implemented full CRUD operations, JWT & Refresh Token authentication, and role-based authorization for 200+ users. Integrated Hangfire to automate scheduled background jobs, and Serilog for structured logging, reducing debugging time by 30%. Added Audit Logging and FluentValidation to ensure 100% traceability and data accuracy.

Successfully deployed on MonsterASP.NET with a cloud SQL Server database, achieving 99.9% uptime.

EXO-AI Mobile Application

ExoAI is an AI-powered platform built for the NASA Space Apps Challenge to automate exoplanet candidate classification using open-source data from Kepler, K2, and TESS missions. It integrates machine learning, a .NET 9 backend, and a Flutter interface to deliver accurate, real-time predictions and enhance exoplanet discovery efficiency.

Survey Basket API

Developed a robust Web API using ASP.NET Core and Entity Framework Core for managing surveys, questions, and responses. Implemented full CRUD operations and JWT authentication with role-based access control for secure user management. Used FluentValidation to ensure input data accuracy and Serilog for centralized logging. Integrated SQL Server as the main database with efficient query handling and optimized data relations. Deployed the API successfully on RunASP.NET, providing a stable and scalable backend service.

File Manager API

Developed a RESTful File Manager API using ASP.NET Core 9 and Entity Framework Core to handle file and image uploads, downloads, and streaming. Implemented database storage for file metadata with SQL Server, validation using FluentValidation, and full API documentation via Swagger, OpenAPI and Postman. Designed with a clean, service-based architecture for scalability and maintainability. Ensured efficient file handling, secure data access, and smooth integration within modern web applications.

SKILLS

Backend: C# | OOP | ASP.NET Core | Web API

Databases & ORM: SQL Server | LINQ | Entity Framework Core | ADO.NET

Core Concepts: Problem Solving | Data Structure | Algorithms | SOLID | Design Patterns

DevOps & Deployment: Git | GitHub | GitHub Actions | MonsterASP.NET

Programming Languages: C++ | C#

Frontend Technologies: HTML5 | CSS3 | Bootstrap

Soft Skills: Teamwork | Research | Time Management | Communication Skills

EDUCATION

Faculty of Computers and Information, Zagazig University

September 2022 – Present

GPA: 3.45/4.0

LANGUAGES

Arabic — Native

English — Good
